☒ Continuation Sheet Attached

Brief Description of Arguments to be Presented:

With regard to Claim 3, the Office Action indicates that Kanevsky discloses that a mobile device sends, to a server, device profile information that describes the display limitations of the mobile device, or in other words, how many characters the mobile device can display. Applicants are actually not trying to claim this in Claim 3.

Brief Description of Arguments to be Presented:
(continued from prior page)

Applicants are trying to claim, in Claim 3, that the mobile device sends information that indicates how many characters the mobile device can **receive** in its memory buffer without losing any data, regardless of how many characters the mobile device can **display** at a time. Can the Examiner suggest an amendment to Claim 3 that will cause Claim 3 to claim that the mobile device sends information that indicates how many characters the mobile device can **receive** in its memory buffer, regardless of how many characters the mobile device can **display**?
